The Architecture of Accomplished Teaching:

Set new high and worthwhile goals that are appropriate for these students at this time

Evaluate student learning in light of the goals and the instruction

Set high, worthwhile goals appropriate for these students, at this time, in this setting

Your Students - Who are they? Where are they now? What do they need and in what order do they need it? Where should I begin?

Reflect on student learning, the effectiveness of the instructional design, particular concerns, and issues

Implement instruction designed to attain those goals

Five Core Propositions

- Teachers are committed to students and their learning
- Teachers know the subjects they teach and how to teach those subjects to students
- Teachers are responsible for managing and monitoring student learning
- Teachers think systematically about their practice and learn from experience
- Teachers are members of learning communities
